

Call for Workshop 2016 SCAR Kuala Lumpur

Dear Colleagues,

It's only 7 weeks until the XXXIV SCAR meeting and our workshop on **Sunday 21 August 2016**. The venue for the workshop will be at the **University of Malaya, IPS Building, Room Seminar A**. We have the room from 08:00-12:00 and 14:00-18:00. However, as we are aware that most of you will just arrive the previous day and having had a long journey, we plan to start only at 09:00 (later arrivals welcome). During the break at lunch-time from 12:00-14:00 there will be the meeting of the Action Group CGG - Connecting Geology and Geophysics. We have specifically chosen this schedule to draw attention to both meetings, and to facilitate your participation in both the ADMAP and CGG workshops.

During our workshop a brief official ADMAP Expert Group business meeting will be held. The workshop will be dedicated to finalizing the map compilation and the accompanying paper as planned in our last ISAES meeting in Goa, and other issues. We need again to discuss the data base and also look at the ADMAP web page which needs a new host and updates.

Preliminary agenda

- 1) Present the status of ADMAP-2 compilation and the techniques required to process, assimilate, archive & release the data.
- 2) Presentations - Antarctic magnetic case studies.
- 3) Discuss the ADMAP-2 roadmap & products.
- 4) Call for a Special Publication on ADMAP-2.
- 5) As discussed during our business meeting in Auckland 2014, Graeme Eagles of AWI will take over the Chair from Detlef Damaske.
- 6) Agenda items for the next meeting.
- 7) AOB

Please send an e-mail to Detlef Damaske/Fausto Ferraccioli if you want to make a presentation at the workshop. You are welcome to send slides even if you cannot attend.

Best regards,

Detlef and Fausto, on behalf of the ADMAP steering committee

Dr. Detlef Damaske (ADMAP chair)
